Memo to Coal File:

RE: Beaver Creek Coal Company
Wild Horse Ridge Exploration
CEP/015/007
Emery County, Utah

On July 15, 1982, the site of the proposed exploration road/portal access in Bear Canyon was visited by Sally Kefer, Mary Boucek, Ev Hooper and Cy Young. The purpose of the visit was to familiarize Division personnel with the proposed area of disturbance caused by construction of the road. Representatives of Beaver Creek Coal Company present at the inspection tour were Dave Meyer and Alex Papp.

It was noted that during the inspection tour three truck-trailer loads of coal were transported down Bear Canyon from the adjoining Bear Canyon Co-op minesite. This is supported by photographs taken during loading of the trucks.
